

FRANCISCO, (June 8.—A general automobile runaway occurred today. The occupants of the machine were M. Cohen, a mining man who resides at the Palace Hotel, and his wife, Mrs. Gorden. The lady was operating the motor, when it suddenly refused to obey her hand and started

IN HONOR OF THEIR DEAD.

Solemn Memorial Rites of the Woodmen.

Local Observance of Annual Custom.

Unveiling of Monuments and Decoration of Grassy Mounds.

Loving tributes of respect were paid to dead comrades by nearly two thousand Woodmen and Women of Woodcraft in Los Angeles yesterday. It was one long day of memorial services, beginning at 8 o'clock in the morning and ending with early evening. Words of eulogy were spoken in honor of the departed; newly-cut flowers were strewn on old-made graves, and in several instances monuments were dedicated to Woodmen and Women of Woodcraft who have died in the past year.

It is estimated that nearly two thousand members of the organization took part in the ceremonies, which comprised parades through the downtown streets, and visits to Evergreen and Rosedale cemeteries.

At 8:30 a.m. the different camps and circles assembled at Hazard's Pavilion,

J. Akerick; Downey Circle, No. 103, Downey; Meadow Circle, No. 347, Compton; Inglewood Degree Team, Capt. G. Stevens; Inglewood Camp, No. 329, Capt. J. T. Nelson; Pasadena Degree Team, Capt. E. O. Nay; Pasadena Camp, No. 332, Capt. A. H. May; Palm Camp, No. 367, Palma, Capt. George B. Charnock; Fern Camp, No. 417, Norwalk, Capt. Roy Porter; Los Nietos Camp, No. 214, Downey; Compton Camp, No. 578, Compton.

AFTERNOON EXERCISES.

The afternoon line of march was east on Fifth to Broadway, north to Third, east to Spring, south to Sixth, west to Broadway, south to Seventh, and east to Spring street. From this point electric cars carried the crowds to Rosedale Cemetery.

As the white-dressed women, with their vari-colored regalia, and the brilliantly-clad degree teams passed through the streets, they attracted the attention of large crowds of spectators, who lined the sidewalks, and the moving picture was made more attractive by the evolutions of the well-drilled marchers. Thousands of visitors were drawn to Rosedale to witness the ceremonies.

At 2:30 p.m. the different camps and circles assembled at Hazard's Pavilion,

UNVEILING A MONUMENT.

ENTERING EVERGREEN CEMETERY

and a short time later they formed in marching order on Fifth street, just north of Central Park.

MARCH AND MARCHERS.

Headed by the local circle of Women of Woodcraft, which was followed by the Los Angeles Camps of Woodmen, the parade moved east on Fifth to Spring street; north to First and east to Los Angeles street, where spectators were seated and the journey was made to Evergreen Cemetery. Each division was preceded by a band, and the commanders and order in which the march was made were as follows:

Woodcraft division: Assistant grand marshal, R. D. List; aides, Mrs. N. Glave, Mrs. J. H. Clarke, Mrs. Flora Glass, Mrs. C. Cunningham, singers, Golden State Circle Guards, Capt. Ida Bettsworth; Golden State Circle, No. 328, Capt. Sarah Frary; Lauratus Circle Guards, Capt. Maud Crawford; Lauratus Circle, No. 83, Capt. Alice Grover; Poinsettia Circle Guards, Capt. Mrs. Connet; Poinsettia Circle, No. 448, Capt. R. L. Bibb; Los Angeles Circle Guards, Capt. F. D. Watkins; Los Angeles Circle, No. 336, Capt. Mrs. Fisher.

Woodcraft division: Color sergeants, I. O. Lynch, L. R. Laboy, A. R. Jackson; grand marshal, C. M. Stamm; aides, George I. Kite, W. H. Hann, F. P. Wines, J. H. Clarke; flower float, Los Angeles Degree Team, Capt. W. F. Augustine; Los Angeles Camp, No. 402, Capt. W. O. Morton; La Flecha Degree Team, Capt. W. Shreve; La Flecha Camp, No. 63, Capt. W. A. Wines; Freedom Degree Team, Capt. Fred Knowles; Freedom Camp, No. 466, Capt. A. J. Bonfield; East Lake Degree Team, Capt. F. Springman; East Lake Camp, No. 530, Capt. A. L. Wicks.

AT EVERGREEN CEMETERY.

Arriving at Evergreen Cemetery, the line of march was formed at the entrance as above, except that all circle guards were massed and preceded the circles, and the degree teams in massed led the camps.

Following the wide paths of the beautiful city of the dead, the marchers proceeded to the Biedel monument, which was erected lately, and which was draped with the national colors, awaiting the unveiling ceremonies. The principal exercises of the Woodmen were held at this spot; the usual ritual being followed, and the decoration of the grave with flowers coming immediately afterward. The Freeborn monument was unveiled, solemnly and decorations of flowers were placed by the circle guards on the graves of Neighbors Parker, Sprague, Carr and Buer-

MORE NEIGHBORS COME.

During the noon intermission a light luncheon was served at Hazard's Pavilion to those who took part in the morning ceremonies, and shortly before 2 o'clock the members of the camps and circles reassembled for the afternoon exercises. The attendance was augmented by the arrival of Woodmen and Women of Woodcraft from neighboring towns, including Live Oak Circle Guards, Pasadena, Capt. C. Whitney; Live Oak Circle, No. 65, Pasadena; Mignonette Circle, Capt. F. McNamara; at the Park Avenue, D. B. Vanslyck and wife of Pasadena.

DON'T fail to try lunch at Dol Monte.

KITCHEN ECONOMIES.

TRAINING IN THE ART OF PROVIDING GOOD LIVING FROM CHEAP FOODS—THE BUYING AND COOKING.

BY CHRISTINE TERRINE HERRICK.

(Author of "Liberal Living on Narrow Means.")

FIRST, buy them well. Second, cook them well. There is as much in one process as in the other.

A certain pathos attends the sight of an inexperienced young housekeeper going to market. She has so long been a butt for the jokes of the striver after fun that few see the melancholy side of her endeavor to learn how to buy

SAVING ON BEEF.

Beef, too, can be purchased economically, although this is easier to do when the family is large than when it consists of but three or four members.

The beef is unfortunately built on a large scale and no ingenuity has as yet evolved a miniature edition for use in flats and small private families. These have to make up for the lack of a butcher's skill in cooking the inferior cuts.

The housekeeper who can buy a large piece of beef is able to make an appreciable economy by purchasing a whole sirloin at once. This will doubtless weigh from fifteen to sixteen pounds.

insure that the family will weary of the very sight of it before they can consume it.

Take a fowl suitable for roasting. Try and secure one that is not very tough. Even fowls vary in this regard. Truss it. Do not stuff it, and put it over the fire in a pot with a tightly fitting top. No water goes in with it, just a heaping teaspoonful of butter—Truss it. Do not stuff it, and put it over the fire in a pot with a tightly fitting top. No water goes in with it, just a heaping teaspoonful of butter—

poor woman who buys the cheap cut of meat, the inexpensive vegetable, must pay her price in careful cooking if she would raise her less expensive purchase to the level of the high-priced foods. Far better do this than let carelessness in the kitchen force from the eaters a price in indigestion and consequent impaired nerves and temper.

To make cheap foods appetizing the chief essentials are probably patience and a gift for seasoning. Some persons are born with both. Others have to work hard to get either. But their possession should be enough to insure a happy home to any one who appreciates good living.

METHODS.

Cheap meat, as a rule, demands slow cooking. To this there are some exceptions. A shoulder of lamb may be roasted precisely as is one would roast a costlier leg—with the first short period of sharp heat, to sear the outside of the meat and seal in the juices, and the second period of lowered temperature that finishes the cooking. A good round steak can be broiled as would be a porterhouse, and cheap beef is boiled in the same fashion as that which costs more. An imitation of steak that is not to be despised may be made of beef from the round, chopped and molded into the form of a steak, broiled over clear fire and dressed, like an ordinary steak, with butter, pepper and salt.

But when it comes to stews and sautons, ragouts and entrees, there is no short-cut to success. Slow cooking is as much to do with a good dish of this kind as the skillful seasoning that gives the final touch of savoriness. The really elegant dishes that have high-sounding names attached to them are often built on a very cheap foundation. Even those of the high-priced materials may sometimes be achieved by aid of the before-mentioned patience in cooking and care in seasoning. Take, for instance, that very excellent dish, chicken in casserole, for which cook books invariably demand young roast-chickens. In place of this a fowl will serve if prepared by the following method:

"CHICKEN IN CASEROLE."

Take a fowl suitable for roasting. Try and secure one that is not very tough. Even fowls vary in this regard. Truss it. Do not stuff it, and put it over the fire in a pot with a tightly fitting top. No water goes in with it, just a heaping teaspoonful of butter—

Straight Piano Talk

A good piano is a first-class investment as well as a means of culture and pleasure. There is no article manufactured that will give as large a return for the money invested. Granting this to be true, what piano will be sought after by those who wish to buy an instrument at a fair price? It must have not only a good tone but a pretty case, and as you do not buy one every day, it must be built to stand years of use. The

EMERSON PIANO

fulfills these conditions. It is handsome in its exterior appearance, musical in its tone qualities, and the price at which it sells brings it within the resources of persons of moderate means. As to its wearing qualities, its many years before the public (almost sixty) have demonstrated them, while the number sold (over 75,000) proves its great popularity. It has every point to recommend it to the prudent buyer. Sold on easy terms.

as long as steam continues to be used the reciprocating engine will for some classes of work continue to be the most serviceable motor. To particularize, we have only to refer to the steam locomotive to convince every one who is

familiar with the demands and exigencies of locomotive service that the turbine is never likely to displace the reciprocating engine in this class of work. "As an electrical drive, however, it is preeminently qualified, and, since electrical power seems destined to indefinitely enlarge its field of application, the growth of the steam turbine in connection with the electrical industries is destined to be rapid and widespread. But, although the turbine is not applicable directly to the locomotive and the street car, it is the ideal

"In any case the difficulty is so greatly outweighed by the economy of the turbine in weight and fuel, and by the advantage of a complete absence of vibration, that we look to see the steam turbine enjoy a monopoly as a marine motor."

The second only to that which it will achieve in connection with electrical power on land. Indeed, the only classes of work to which the turbine may not prove to be immediately applicable are those which involve much starting and stopping and considerable running at slow and intermediate speeds. In work of this kind the reciprocating steam engine will always find a limited sphere of usefulness, unless, indeed, even here it is driven out by the ubiquitous electric motor.

The advance of the steam turbine during the past few months, both in

use and power, and in its application to large plants, has been quite remarkable. Two of the largest manufacturing concerns in this country have been forced, for some time, to watch closely its development, and have themselves been conducting experimental work to determine its efficiency and to improve its existing forms. Although the Parsons turbine is an English invention, and practically all the work with large units that has been accomplished has been done by these machines, it is a fact that the Westinghouse company, which secured the rights for the Par-

These Westinghouse-Parsons machines, as they are called in this country, have been giving most excellent results, and the 2500-horse-power turbine, which has now been employed for about a year in an electric light and power plant at Hartford, Ct., is the largest turbine and probably the most economical steam engine in the world. In addition to these machines, we understand that the same company has

received an order for a large turbine for South Africa, which is to be used in a big power-transmission scheme that is being worked out in the Rand gold fields. The General Electric Company is in operation at its works a 750-horsepower turbine of the bucket-and-nozzle type, the plans for which have been worked out by the company's engineers. This turbine was also shown in excellent economy, and we understand that the company stands ready to manufacture it upon a commercial basis.

"Most significant fact of all, pointing to the ultimate monopoly, of the

team-engineering field by the new type of engine, is the confidence with which the great railway and power companies are adopting the turbine in their generating units as a drive for electrical generators. We referred last week to the fact that the London Underground was equipping a 100,000-horse-power turbine. We are now able to announce that it is only a question of time before nothing is expected to enter into the new rapid transit system to be equipped with the new, rapid turbine.

The probability is that the new 25-knot liners for the Cunard Company will be driven by turbine engines, while a sister ship to the turbine passenger steamer King Edward, which did such good work on the Clyde,

year, is under construction, and three large steam yachts have also been ordered in Great Britain which are to be equipped with the same motive power. Incidental evidence of the widespread appreciation of the fact that we are on the eve of revolutionary changes in motive power came to our notice the other day in the case of one of the largest steamer yachts that has ever been planned in this country. At the eleventh hour the owner requested that the plans be withheld in abeyance for another season until the new season had opened.

A book of happy, healthy, **WELL WAS TOO STRONG FOR**
some babies which gives their **THE MUD HENS.**

A petition asking the Charter Review Committee to include the initiative of a referendum system for a new charter, has been circulated on Pico Heights and generally signed.

Silver Leaf Rebekah Lodge, No. 27, I.O.O.F., at its last meeting added six new members, and the degree work was staffed by the Arbor Vitae degree staff. Visitors were present from all parts of the city and from several other States. The hall was handsomely decorated, and light refreshments were served under the supervision of Capt. Frank Gillespie.

Silver Leaf Lodge will soon have a first-class degree staff in working order, and the last class of candidates will be initiated.

tells where they live and what the
parents say about them.

of sidewalks here by bicycle riders. A number of persons are constantly endangering the safety of others by riding on the sidewalks. It is hoped that the occasional visit of a policeman to the heights wouldn't come too often. The police haven't been seen this side of Union avenue.

J. R. Kilpatrick has sold for Mrs. C. J. Hart to Sylvester Davenport, lot in the new subdivision of the Erie Railroad Homestead tract, located at the southwest corner of Twelfth and Hidalgo streets, for \$1100. Mr. Davenport is a resident of Westport, Connecticut, will build for their own home.

A sermon on "The Children and the Church" was preached yesterday morning at the Pico Heights Congregational Church, by Rev. J. M. Shaefee. Last Sunday's sermon on the same programme was given by the children of the Sunday-school, under the

The book also tells something about Mellin's Food—what it is

supervision of W. E. Herendeen. The missionary society of this church held a meeting Wednesday afternoon at the home of Mrs. B. B. S. Sebeleva, 235 S. Pulveda street, at which Miss Beleva, a former teacher in the Flak University, gave an address on the work among the colored people in the South.

"Incentives to Giving" was the sermon topic at the Pico-Heights Methodist Episcopal Church yesterday morning by Rev. D. B. Lockwood, and last night the Sunday-school gave a Children's Day service, entitled "The Conquering Christ," the programme being in charge of A. B. Grannis. A ladies' prayer meeting

how it is used — why it is needed.

UNIVERSITY.

There has been an increase of from 10 to 20 per cent. in the value of real estate in this section within the last few weeks. The greatest advance has been made in the Rindge and Charles Victor Hall tracts. It has been a genuine rise in value, and not simply a mark-up in price, for property representing a large sum of money has actually changed hands in the hands of purchasers. The recent tendency of real estate investors to procure desirable residence property has had a stimulating effect on West in Angeles county, while the actual commencement of the \$50,000 Rindge mansion in the tract that bears his name, and the

son of the corner of Hobart and Adams streets, who has been an electrician in the United States Navy, has secured his discharge and returned home.

Mrs. Worswick of Hanford is visiting her daughter, Miss Marian Wors-

West Jefferson street, which is the south boundary of the Charles Victor Hall tract, have also made largely for the loss in this section.

No individual or corporation seems more alive to the coming growth of this section than the Edison and Los Angeles companies. They have been engaged in a lively contest for supremacy in this field. Some time ago the Los Angeles company stole a march on Edison by securing a franchise for the whole portion of the Charles Victor Hall tract. Last week the Edison people evented them up by placing their poles on every street and alley in the Rindge tract.

Miss Carrie McConnell of No. 1037 West Thirtieth street entered the contest by purchasing the franchise for the whole of the Rindge tract. Ray Mathis, who was recently graduated from the Chicago Dental College, the guest of the Edison company, has been in the Rindge and Ashland streets.

wick, who will be graduated from the College of Music this year.

Mr. and Mrs. George Beach, of the corner of Adams street and Western avenue, leave this week for a three months' visit in Seattle.

Edwin McConnell, formerly of West

and Messrs. Winfield Hale, Harry Dukes, Loren Wellington, and Dr. Ray Mithlis.

Dr. R. S. Slaughter has sold his ten-acre ranch on Western avenue for \$7500, and will at once commence the erection of a new home on his lots on the corner of Western and Vermont and McClintock avenues.

Chapel exercises were held for the last time on Tuesday. Dean Randall gave the invocation, and the choir sang and a prospectus of the next year's college songs were sung by the students, and a farewell was given to the graduates.

Contrary to the usual custom, the faculty, this year demanded examinations from the general student body, and the student body, in turn, refused to give their class-day programme, and to take part in the commencement exercises on Thursday.

These examinations were arranged, which allowed

A book of happy, healthy, happy babies, which gives their names, tells where they live and what the parents say about them.

The book also tells something about Mellin's Food — what it is, how it is used — why it is needed.

You can have this book by sending us your name on a postal card.

Mellin's Food contains the nutritive elements for the flesh, bones, muscles, and in fact, it nourishes the whole system and provides for a perfect and normal development.

MELLIN'S FOOD COMPANY, BOSTON, MASS.

received their diplomas before graduation, but had not held them long before a representative of the faculty demanded of them the cherished "sheepskins," explaining that they would be returned after the examinations had been passed.

Edwin Alderson, son of F. A. Alderson, of Hobar, Adams streets, who has been an electrician in the United States Navy, has secured his discharge and returned home.

Mrs. Worawick of Hanford is visiting her daughter, Miss Marian Worawick, who will be graduated from the College of Music this year.

Mr. and Mrs. George Beach, of the corner of Adams street and Western avenue, leave this week for a three months' visit in Seattle.

Edwin McConnell, formerly of West Thirty-seventh street, and well known in this part of town, has been appointed a member of the Manila police force.

CARTER'S LITTLE LIVER PILLS.

CURE SICK HEADACHE

Bracehead, yet Carter's Little Liver Pills are equally valuable in Constipation, curing and preventing this annoying complaint, while they also correct all disorders of the stomach, stimulate the liver and regulate the bowels. Even if they cause cured.

Ache they would be almost intolerable to those who suffer from this distressing complaint; but fortunately their goodness does not extend here, and they who suffer from it will find these little pills valuable in so many ways that they will not be willing to do without them. But after sickness head-

ACHE

In the hands of so many lives that, here is where we make our great boast. Our pills cure it while others do not.

Carter's Little Liver Pills are very small and they say to take. One or two pills makes them. They are strictly vegetable and do not grip or purge, but by their gentle action, please your bowels. In vial at 50 cents; five for \$1. Sold by druggists everywhere, or sent by mail.
